## Agenda – 10/823,050

1. A computer navigation system, comprising:  
one or more interactive links displayed on a display connected to a computer appliance;  
and  
one or more visual linktags associated with individual ones of the one or more interactive links, the one or more visual linktags displaying one or more numbers, characters or symbols, the system enabled to initiate an interactive link in the display upon user input of one of the numbers, characters or symbols displayed in a visual linktag of the one or more visual linktags, the visual linktag is separate from and displayed simultaneously with the interactive link.
- A. 35 U.S.C. 101: The above claim was rejected as not positively reciting elements of hardware, but the claim recites “a display connected to a computer appliance” – could you please clarify what further amendments, if any, are suggested to overcome this rejection?
- B. 35 U.S.C. 103(a): Does the proposed amendment “the system enabled to initiate an interactive link in the display upon user input of one of the numbers, characters or symbols displayed in a visual linktag of the one or more visual linktags, the visual linktag is separate from and displayed simultaneously with the interactive link” clarify the aspect of the visual linktag and distinguish from the cited references?
